

Joe's mum starts her new job tomorrow and decides to give her uniform a quick wash so she'll be extra smart!

Oh no! The control has snapped off and my uniform's in the washer. I can't even open the door to get it out!

Don't worry mum, I've got an idea.

Oh no! I need my uniform for tomorrow! We can't get a repair lady out at this time in the evening!

Hi Billie - I've got an urgent job I need help with. Could you meet me at the 3D Printing Hub in 20 minutes?

CoLiDo Joe decided to call his good friend Billie to ask for a little help before setting off in his car

Hi Cheng, Are you able to help create a print file if I email you a photo now?

Joe calls up his friend Cheng at CoLiDo's headquarters in China

No problem Joe, send it straight away!

That's great Billie, Let's hope this does the trick!

Cheng's file looks perfect! I've uploaded the file and we're ready to start printing.

That seems to fit perfectly! Now we'll be able to complete the wash and get your uniform out mum.

Thanks so much Joe, you've really saved the day!

I wouldn't have been very popular turning up in my jeans on my first day!

Thank goodness I can wear my uniform to work
